Roofing & Walling

Using corrugated sheeting and cladding sheeting for roofing and walling has many benefits.

These materials are lightweight, durable, and cost-effective, making them an excellent choice for both residential and commercial applications.

Corrugated and cladding sheeting from Matrix requires minimum maintenance and is easy to install.

If you're looking for supply only or supply and install, trust Matrix to provide the right solution for your house, office, shed or commercial

building that's locally made, using 100% BlueScope steel.

Colour selection is easy with Matrix Steel and COLORBOND®. Choose from the classic colour palette or opt for a matt finish colour for your roof or wall. Either way, Make it a Matrix.

Colorbond®

Zincalume®

Corrugated-762

Corrugated-762 from Matrix Steel is rolled from light gauge high tensile steel. The benefits are strength without weight and an ability to span long distances.

You'll never go wrong with this workhorse profile.

Suitable for all roofing and walling applications.

MATClad-762™

The unique design of this profile allows for greater water carrying capacity even at lower pitches due to the deeper curves.

Suitable for domestic applications and industrial or rural use such as warehouse roofs and walls.

Suitable for all roofing and walling applications.

MATSpan™

As good looking as it is practical, this contemporary looking profile is equally at home in a domestic or industrial application.

Use MATSpan™ where a stronger and longer span is required.

Suitable for all roofing and walling applications.

MATDek™

This pierced fix, high strength, low pitch roofing profile is your go to for warehouse roofing, carports and pergolas. Minimum pitch 1-60.

Trust a Matrix to give you versatility and strength.

Suitable for all roofing applications.

HiMAT-Nailstrip

The HiMAT-Nailstrip profile is a modern tray roofing and walling system which is nailed to plywood. Smooth bold lines and efficient water carrying capacity makes this an excellent choice for domestic or industrial application.

Suitable for all roofing and walling applications.
